

26S1 IT1X15: UX Design in Web Development

ASSIGNMENT (Website & IBM SkillsBuild) 30%

Instructions:

1. This is a group assignment and you are to work in teams of **2**. Ensure that your website is not identical or similar to any other group's work. For odd numbered class sizes, there should be **only one** team of **3**. (No solo learner arrangement is allowed for this assignment)
2. The website carries a **weight of 25%** and the IBM SkillsBuild online course carries a **weight of 5%** of the entire module of UX Design in Web Development.
3. At the end of this assignment, you are to submit to Politemall a zip file containing all the files used i.e. HTML / CSS / JavaScript / images / media etc and a screenshot of your progress in the IBM Skillsbuild's Web Development Fundamentals unit.
4. You are to do a **Hobbies** website. (e.g. Video Content Creation, Photography, Gaming, Astronomy, Baking, Roblox/Minecraft Building, etc) Please take care not to have any offensive content e.g. sexual, religious bigotry, racism, etc.
5. You should treat the website assignment as a portfolio to show off your skills in UX and Web Development to a prospective partner/group with a similar interest.
6. Your website assignment should include the following minimum requirements:
 - Bootstrap 5
 - Hyperlinks
 - Multimedia elements (e.g. pictures, video, audio)
 - Table(s)
 - Form(s) (with submit button, a response page to show the data entered in the form)
 - Cascading Style Sheets to style your website
 - Navigation menu to navigate across all webpages
7. Each student is to produce a minimum of 2 web pages. Hence a team of 2 should have a minimum of 4 web pages.
8. You are not to use any front-end JavaScript development framework (e.g. React, Vue, Angular, etc.) for this assignment.

-
9. Plagiarism will NOT be tolerated. The work submitted must be done by yourself. Any student who, after due disciplinary process, is found to have committed an act that contravenes academic integrity in any assessment of a module shall fail the module.
 10. Refer to the rubrics in Appendix A.
 11. Deadline for submission of final deliverables in Politemall is **16 Aug 2026, Sunday, 2359hrs.**
 12. During lab session on Week 17, each team will do an 8-min presentation to your tutors followed by a 5-min Q&A. Presentation should cover, through a demo of your website:
 - the choice of design theme for your website
 - main features of your website
 - how you have made effective use of CSS and Bootstrap
 - how you have made effective use of JavaScript
 - how your website can help to market your hobbies and attract like-minded members

Late Submission and Penalty

For late submissions of 5 calendar days or less,

- If you passed the assignment/project deliverable, your score will be capped at 50% of the base score of the assignment/project deliverable.
- If you failed the assignment/project deliverable, you will be awarded a failed score.

For late submission or more than 5 calendar days,

- You will be awarded zero marks for the assignment/project deliverable.

Please note:

- It is your responsibility to ensure that your submission is complete and correct. You may wish to download a copy after submission to verify that all files are included and accurately submitted.
- If you have multiple submissions, the most recent submission will be considered as your final version and will be subjected to penalty if it is submitted late.

Academic Integrity

The following are considered acts of academic dishonesty:

- Attempting to get or provide unauthorised assistance in an assessment.
- Falsifying data, information or citations.
- Asking another person to complete the work that the candidate is supposed to do
- Taking and using the whole or any part of ideas, words or works of others, including contents generated by AI tools and passing it off as one's own work without acknowledgement of the original source.

If you are caught cheating for the:

- First time in any assessment, you will fail the entire learning unit.
- Second time in any assessment, you will fail all learning units in that semester.
- Third time in any assessment, you will be removed from the Polytechnic.

Guidelines for AI Policy

The following guidelines apply to the use of AI tools:

- You must not use AI tools for plagiarism or cheating by presenting generated output without proper acknowledgement of the original source.
- Only use AI tools to supplement your studies, clarify ambiguous concepts, and assist with research, in an ethical and responsible manner.

-
- Properly cite the source and credit AI tools in your academic work.
 - Be able to prove that you comprehend the output from the AI tools and know how to apply them in your academic work when being asked.

Appendix A: Rubrics

Element	Inadequate Grade F ≥0 and <2.5%	Acceptable Grade D ≥2.5 and <3%	Satisfactory Grade C ≥3 and <3.5%	Good Grade B ≥3.5 and <4%	Excellent Grade A ≥4%
Content, UI Design and Bootstrap (5%)	Content is not relevant with many broken links. No interactive features implemented. Navigation is very unclear, illogical, and inconsistent, making the site extremely difficult to use. Users are likely to get lost. Many links are broken or missing. Little to no clear site structure is apparent from the navigation. The website has a poor visual design and appears unprofessional or unfinished. Layout is	Relevant content is available and readable. No interactive features implemented. Navigation is somewhat confusing or inconsistent across pages. Users may struggle to find information or understand the site structure. Several links may be broken or misdirected. The website's visual appeal is lacking or unprofessional. Layout is cluttered, confusing,	Relevant content is available and of good readability. At least one interactive feature implemented is working. Navigation is mostly clear and functional, allowing users to access main sections. Some minor inconsistencies or less intuitive elements might be present. A few links may have minor issues. Basic site structure is evident in navigation. The website has a basic but acceptable visual appeal. Layout is generally clear, and	Content shown address users' needs and of good user interface. Interactive features are successfully implemented. Navigation is clear, generally intuitive, and consistent. Users can navigate the site with ease. Most, if not all, links are functional. Site structure is logical. Only minor improvements could be suggested for enhanced user experience. The website is visually appealing and professional. Layout is well-structured and	Content shown effectively addresses users' needs and of professional user interface. Interactive features are successfully implemented with high usability and desirability. Navigation is exceptionally clear, highly intuitive, and consistent across all pages. Users can effortlessly find information and understand their location within the site. All links are fully functional. Site structure is logical and well-represented by the navigation. Advanced navigation features (if any) are implemented effectively. The website is visually outstanding, with a highly professional and engaging appearance. Layout is clear,

	disorganized, showing no clear structure or consideration for user experience. No evidence of effective Bootstrap implementation for responsiveness. Lacks any design consistency.	or poorly executed. Bootstrap is implemented poorly or not effectively utilized for responsiveness, resulting in significant display issues on different devices. Significant design inconsistencies are present.	Bootstrap is used for basic responsiveness, though some elements might not adapt perfectly or appear slightly disorganized on some screen sizes. Some inconsistencies in design may be present.	effectively uses Bootstrap for good responsiveness with minimal issues. Design elements are largely consistent and appropriate.	logical, and expertly utilizes Bootstrap for a fully responsive and adaptive experience across various devices. Consistent and sophisticated design language (colors, fonts, imagery, spacing) is evident throughout.
Element	Inadequate Grade F ≥0 and <5%	Acceptable Grade D ≥5 and <6%	Satisfactory Grade C ≥6 and <7%	Good Grade B ≥7 and <8%	Excellent Grade A ≥8%
Coding on HTML, CSS and JavaScript (10%)	Poor usage of tags. Usage of obsolete html code copied from internet. Files are disorganized. Different types of files are in same folder. No consistency in placing of functions and HTML sections. Codes difficult to understand. No comments. No form processing using javascript. Did not or very little use of javascript.	Correct usage of HTML (structure) tags for most of the web content. No proper organization of files, though there are folders. Codes show some structure in layout but not consistent in all web pages. Comments are insufficient. Has form processing using some javascript. Shows some attempt at	Correct usage of HTML (semantic and structure) tags for all web content. Files are fairly well organized. Have folders but some files are not placed in correct folders. Codes are fairly organized in some sections. Have some comments. Good use of javascript in form processing. Shows use of javascript	Correct usage of HTML (semantic and structure) tags for all web content. Able to apply new and relevant tags/features. Files are fairly well organized within folders, though a small number may be misplaced. Codes are mostly clear except in some sections. Have sufficient comments. Good use of javascript in form processing. Shows good use of javascript throughout web pages	Correct and comprehensive set of HTML (semantic and structure) tags used for all web content. Able to apply new and relevant tags/features. Files are well organized. Folders for css files, images, multimedia. Functions and HTML are well layout. Comment statements are clear. Good use of javascript in form processing. Shows wide use of javascript throughout web pages for features using DOM or external API.

	Cannot explain usage of HTML, CSS, JavaScript and Bootstrap and cannot demonstrate understanding of why the approach was chosen.	Can explain usage of HTML, CSS, JavaScript and Bootstrap in only a few areas and can hardly explain why the approach was chosen.	Can explain usage of HTML, CSS, JavaScript and Bootstrap in some but not all areas and can partially explain why the approach was chosen.	Can explain usage of HTML, CSS, JavaScript and Bootstrap in most areas and partially explain why the approach was chosen	Can explain usage of HTML, CSS, JavaScript and Bootstrap clearly and explain convincingly the approach was chosen.
Element	Inadequate Grade F ≥0 and <5%	Acceptable Grade D ≥5 and <6%	Satisfactory Grade C ≥6 and <7%	Good Grade B ≥7 and <8%	Excellent Grade A ≥ 8%
Presentation (10% Individual)	Speaker appears very uncomfortable Displays poor use of eye contact, posture, gestures, and vocal expressiveness. Not fluent or poor pronunciation, thus affecting the audience's understanding. Poor use of graphics and visuals.	Speaker appears rather uncomfortable Displays limited use of eye contact, posture, gestures, and vocal expressiveness. Fluency can be better, but the audience's understanding is not affected. Rudimentary use of graphics and visuals.	Speaker appears relatively confident Displays relatively good use of eye contact, posture, gestures, and vocal expressiveness. Minor errors in English and glitches in delivery. Acceptable use of graphics and visuals.	Speaker appears confident Displays good use of eye contact, posture, gestures, and vocal expressiveness. Fluent with glitches in delivery. Good use of graphics and visuals.	Speaker appears very confident Displays effective use of eye contact, posture, gestures, and vocal expressiveness. Excellent use of graphics and visuals.
